

Robust integrations to simplify your work

Connect Netpresenter with the tools you already use to automatically display and share existing content. Avoid double entry to save valuable time, and deliver relevant content to keep everyone informed about the latest updates.

Microsoft SharePoint

Bring your SharePoint to life. Actively bring existing content to employees' attention using any available screen and device within your organization. Generate more traffic and easily increase intranet visits. [LEARN MORE >](#)

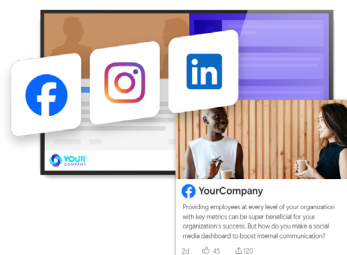

Microsoft Teams

Avoid a jumble of information, in which important messages drop out of sight, and people lose the overview. Use our Microsoft Teams integration to keep Teams organized for everyone; even for people without access to a computer. [LEARN MORE >](#)

Microsoft Power BI

Boost your Business Intelligence and become a data-driven organization. Automatically display Microsoft Power BI reports and dashboards on every screen within your organization with our powerful integration. [LEARN MORE >](#)

Social Media

Enhance employee engagement by displaying the most recent updates from your corporate social media accounts, such as Facebook and LinkedIn. This keeps everyone updated and connected with the latest news and developments. [LEARN MORE >](#)
