

The **visual** Employee and Emergency Communications Platform

Netpresenter is a visual communication platform for employee and emergency communication. With effective tools, powerful features, and robust integrations, it keeps your entire workforce informed, engaged, productive, and safe.

Effective **communication** tools to reach every employee

Our employee communication platform offers an omnichannel approach with a comprehensive suite of native tools and apps for PCs, TVs, and mobile devices. Netpresenter provides unmatched flexibility in delivering effective communication, ensuring that your organization has everything needed to reach and engage every employee across various devices.

Corporate Screensaver

Transform every inactive computer screen in your organization into a dynamic and interactive communication channel.

Digital Signage

Publish internal news, announcements, important updates, and other engaging content on every available TV screen.

Employee App

Whether your employees are working from home, on the road, or in the field, they will stay informed about the latest company news.

Desktop Alerts

Grab the attention of every employee instantly with highly visible PC pop-ups for urgent and important updates.

The **benefits** of our Employee Communication Platform

Visually engaging

Presenting information in a visually appealing manner ensures Netpresenter grabs attention and effectively reaches all employees in your organization.

Push communication

Netpresenter is designed to actively deliver information in a direct, "in-your-face" visual format, bringing content straight to employees in a way that is impactful and engaging.

Omnichannel

Displaying content on all available screens (TV, PC, Mobile Devices), our platform ensures your messages reach every employee across the organization.

Versatile

Beyond day-to-day communication, Netpresenter provides a reliable emergency communication solution, enabling you to reach employees quickly during critical situations.
