

Release Notes

Autumn 2021

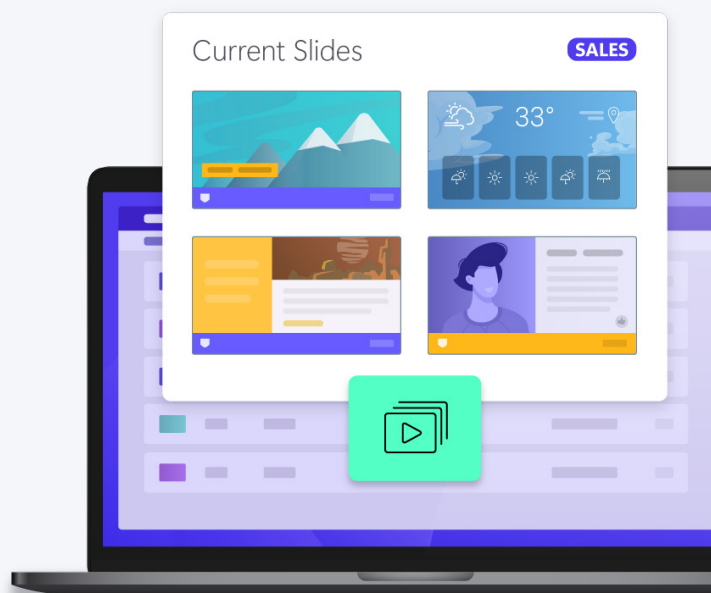

Update now!

Update to the latest version and
unlock all new features

Netpresenter Playlists

With our new playlists feature, you will see at a glance what content is displaying on each screen and what your employees are seeing. As a publisher, you can see an exact preview of all active slides currently shown on a specific screen. The player list also gives you a complete overview of all PC- and TV players connected to a channel, including valuable details such as username, description, version number, and when the player was last connected.

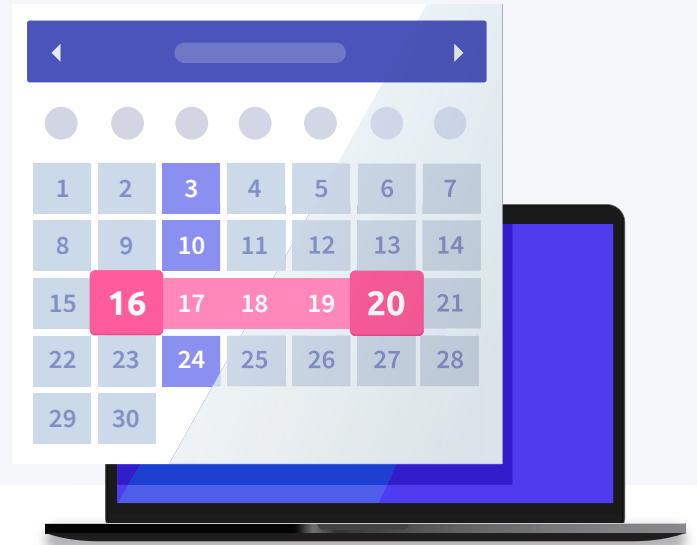

Workplace integration

We're also excited to announce our brand-new integration with Workplace from Facebook. This integration enables you to automatically display the latest updates from Workplace channels on every screen within your organization. Show Workplace posts and updates, including images, and comments, to easily keep your entire workforce informed about the latest company news.

Other improvements and features

Advanced scheduling

Use our advanced scheduling with time intervals to publish messages automatically at convenient moments, like every day during the lunch break or the end of the workday.

- **Multiple file upload**

The Alert Server now supports multiple file upload that allows you to upload several images, templates, or scenarios at once.

- **Default ticker feed**

Apply a default ticker feed to all messages in a channel.

- **Categories**

Create categories (e.g., HR, birthdays, notice) to organize and retrieve your messages conveniently.

- **Message copying**

Easily reuse your messages by copying them to other channels with our handy copy function.

- **Mute video sound**

Mute the sound of videos and YouTube videos.

- **Integrations**

Did you know that you can connect Netpresenter with popular tools to pull content automatically and to display that directly on screens? We offer seamless integrations with SharePoint, Teams, Power BI, and many other platforms! [Visit our website](#) to explore all our integrations.

Latest software versions

- Message Server 17.0
- Alert Server 17.0
- Media Server 4.6
- Player 12.0
