

Release Notes

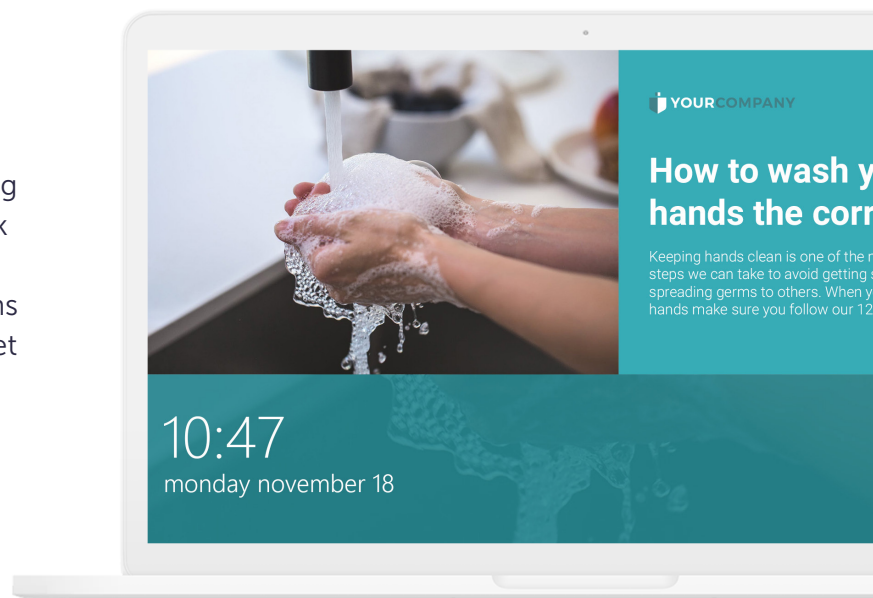

SUMMER 2020

Netpresenter unlocks every screen's communication potential with the introduction of two brand-new products and various new, practical features. Draw even more attention to your messages and reach all your employees, no matter which channel they prefer to keep up to date with the latest company news.

Corporate Lock Screen

Beautiful landscapes and adorable photos of your favorite animals on the lock screens of every computer in your organization are a thing of the past. Use Netpresenter's Corporate Lock Screen to easily share important information with your employees thought their lock screens without disturbing them from their work. Target specific locations or departments to show only the most important information to your employees. You can do this without help or interference from your IT department, as it is super easy to roll out and use the Corporate Lock Screen.

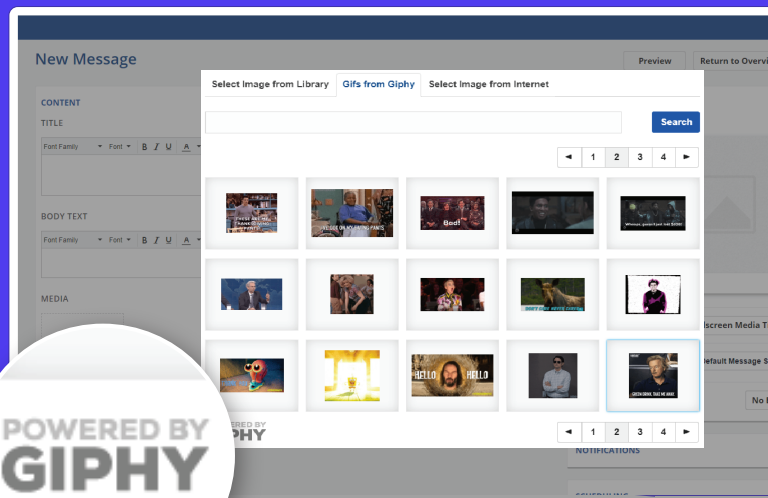

Corporate Wallpaper

Transform every wallpaper in a unique communication channel with Netpresenter's Corporate Wallpaper. The Corporate Wallpaper provides an opportunity to bring the most important messages extra to your staff's attention – a great addition to your current communication channels. Target specific audience groups with relevant information to inform employees without distracting them or flooding them with email.

Other new features and improvements

GIPHY integration

Easily add fun GIFs to your messages with our new GIPHY integration. Search GIPHY via the Message Server and choose from hundreds of fun GIFs to bring your content to life!

Improved Message History

Reuse deleted messages by recovering them directly from the message history to the message overview

Custom fonts

Upload your own fonts to the Message Server to use your own font and apply it to all your templates

Improved color themes

You can now easily re-use or customize an existing color theme with our improved color theme feature

Windows notifications

Call extra attention to your messages by displaying them as 'toast notifications' on the Windows taskbar and in the action center

Alert actions

Set up action buttons and define different alert actions such as text message, call, a respond, or a hyperlink leading to additional information

Manage Players remotely

Manage player settings, such as update interval, player size and screensaver time-out, directly from the Message Server

Direct2D blur

Addition of Direct2D blur effects for images
